

# Library Management Software for Schools

Achieve measurable time and cost savings with Infiniti, our cloud-native intelligent library management solution. Infiniti has many intuitive features and integrates physical and digital resources to elevate school library services to a new level.

## **Engage Your Students**

Create the best experience with a bespoke LMS for curriculum planning.

## **Improve Resource Availability**

Improve return rates and reduce the number of items lost.

## **Save Time & Reduce Stress**

Boost productivity with fewer manual tasks to perform.

## Library Solutions Since 1978

Our objective at PSP is to enhance and improve the quality of your school library service. By providing intuitive, easy to use library management solutions, we create **stress-free experiences in every library**. Not only this, but Infiniti library management software allows us to offer the **latest technology and innovation**, while also providing our extensive consultancy services to library teams and curriculum leaders.

### A True Cloud-Native LMS Platform

Unlike many systems on the market, our Infiniti solution is 100% cloud-native. It was built for the cloud, not adapted for it. This means no additional apps, downloads, software updates or hidden add-ons. While apps can feel “clunky” with a steep learning curve, Infiniti is sleek, intuitive and very easy to use. Once we’ve determined your requirements and tailored a fully fit-for-purpose solution, you’ll be up and running in no time – with our time-served experts always on hand for installation, maintenance and any ongoing after-sales support you might require.

**King's College**  
TAUNTON

“Cataloguing of resources is very simple and efficient – my library monitors learn how to catalogue within five minutes and are always very happy to be assigned this task. Customer service and support are exceptional!”

**Josephine Barclay – King's College Taunton**

## Access Your Virtual Library **Anytime, Anywhere**

Infiniti is cloud-native for easy access from anywhere and it works on any device. The interface design can be tailored to suit your branding and there are lots more customisation and intelligent automation options to reduce the amount of human intervention required for manual library tasks. We understand education and we know that a one-size-fits-all solution won't cut it when you're building a **school library of the future**.

Infiniti includes lots of easy to use features:

- Intelligent search
- Circulation & cataloguing
- Automated email notifications
- Detailed reporting
- AWS data encryption & daily backups
- Fully customisable

**Our stress-free switching service means you can leave the heavy-lifting to our expert team when it's time to migrate from your old school library system to Infiniti!**

### Competitive Pricing

Our simple, transparent pricing model puts you in full control - no unexpected add-ons or hidden charges.

### Free Consultancy

Our initial consultation and any site visits, webinars or demos are free of charge with no obligation.

### Super Secure

Infiniti boasts state-of-the-art encryption for total peace of mind when it comes to privacy.

# Introducing LibPaths™ e-Learning Portal for Schools

LibPaths™ is a flexible virtual learning hub that you can fill with curated content and links to physical and digital resources (on whichever subjects you like) to attract and engage students anytime, anywhere, from any device.

LibPaths™ works alongside Infiniti, our intelligent library management software, and serves as a gateway for students who might not normally engage with a traditional library. In fact, it could be the catalyst for a young person to develop a lifelong love of books and independent learning. LibPaths™ is a cloud-native solution designed to support teaching and learning, providing students, teachers and parents with access to a huge range of curricula subjects and topics for all year levels. LibPaths™ also connects student groups, teacher groups, and even parent groups.

**Limited Time Offer: Book a FREE demo and get our virtual learning add-on LibPaths™ (worth £350) FREE for 12 months when you purchase Infiniti.**

"Infiniti takes records from the British Library and other massive book collections so all you have to do is find the record that suits your library, hit save and it's in your system. Infiniti is a product that works. It isn't over-complicated which makes it very easy to use and the training and support are fantastic. The LibPaths learning portals are my favourite feature! I would definitely recommend."

**Elizabeth Vale – Thomas Mills High School**

## Why Choose PSP Asset Protection?

PSP Asset Protection is a family-run business and one of the UK's leading independent providers of library software, self-service and security systems.

Established in 1978, we've been working with libraries throughout the UK, developing new technologies and extending our services to meet every need. Our expert team have the perfect mix of knowledge, skills and experience to provide the perfect, futureproof solution for library managers, while enhancing the library experience for high school and college students.

"I fully recommend Infiniti as a school library system. It's user-friendly and being able to view reports quickly, with the assurance that the data I am using is reliable and up-to-date, is very important. The team at PSP are easy to contact, efficient, approachable and more than happy to help with any queries."

**Sarah Mason – Farlingaye High School**

## The Smart RFID Library Security Solution

As well as library management software, PSP also has experience in the design and installation of cutting-edge library security systems. One of our solutions is the eRLS anti-theft system that has an innovative, lightweight and compact design to complement the library aesthetic.

Suspended from the ceiling, it provides discreet, effective protection of your stock by monitoring and identifying items that have not been correctly issued, whilst ensuring a smooth flow of traffic.

A single security panel can cover an area of up to 3 metres and houses a visual and acoustic alarm mechanism. It has onboard monitoring for recording and remote consulting of alarms and generates status reports and statistics. No matter what, you will have peace of mind that your collection is safe and secure.

eRLS is an intelligent anti-theft innovation, which operates using RFID technology. Using eRLS systems, librarians can streamline their processes, collection control, shelf management, lost location and general inventory, all whilst feeling like their stock is more secure.

**Trusted by Hundreds of Schools and Colleges**
